

UTP PRO & PRO LITE

Terminal Guide

In the UK, over half of all payments are made by credit or debit card. Contactless payments are now the second most popular form of payment.

In fact, half of us would walk away if we couldn't pay by card.

Accepting card payments results in increased customer spending, loyalty, and overall customer satisfaction.

Accept payment 50% faster than the industry average

We have combined reliability, speed and connectivity to create the UTP Pro. These devices feature multiple connectivity options, including 4G, Wi-Fi and GPRS. With more than one way to connect to the internet you can take payments in and around your business. The card reader also has super-long battery life to ensure your business never misses a sale.

Both devices process all major debit and credit cards. This includes Visa, Mastercard and American Express. You can accept all standard transaction types including sale, cashback and refunds. Contactless payment options come installed on both devices, so you can start selling in seconds.

Key: 1 - One / U - Unlimited

Web Portal Access

- Access through an online portal in any web browser. Giving you the ability to generate real-time reporting in XLSX (Microsoft Excel) format.

Email Receipts

- Email your customers a copy of their receipt directly from the terminal.

120 Day Transaction History

- Reprint or re-email customer receipts from up to 120 days prior straight from the terminal.

Cash Tender Functionality

- Take cash transactions and still be able to offer physical or email receipts.

Staff Log-in

- Create log-in profiles for each staff member to enhance your reporting ability.

User Friendly Interface

- Set an easy to use product basket with fixed or variable prices. Customise the products to suit your needs!

VAT Information

- Separate the VAT from the price of product and display your VAT registration number on your receipts.

Itemised Receipts

- Detail the name of each product on the receipt at the point of sale, as a one off change or it a permanent change through the portal.

Product Management

- Create and manage your products, services, taxes instantly through your online portal.

Secure Cloud Backups (Pro)

Peace of mind knowing your data is stored offsite and online. Giving you the freedom to access your data anytime via our Web Portal.

Real Time Reporting (Pro)

Generate reports effortless with over 20 filtering options such as: Date, Department, Store, Staff Member, Product, etc... Depending on how you configure your set up.

Unlimited Users (Pro & Pro Lite)

Create unlimited staff and supervisor log ins and decide how much or little each user can do all through our secure web portal.

Supervisor Approval (Pro)

Customise what your staff can do. For example, lock additional features like price over-rides and discount options to require supervisor approval at the point of sale.

Epos Functionality (Pro)

Access our world-class built-in EPOS system (Register) with customisation options on over 160 configurable elements.

3rd Party EPOS Integration (Pro Lite)

Integrate our terminal exclusively to a EPOSnow till system allowing you to use your existing EPOSnow equipment with your UTP terminal.

Powered by Android 7.1

A powerful OS giving you access to a world of helpful apps!

5"HD Capacitive Touch Screen

View all your transactions in full crystal clear HD.

Tough Security

Compliant with the latest global regulations and PCI PTS 5.x SRED, top of the line cryptography.

Dual Cameras

Fast scan mobile and QR payment codes with ease.

Super Long Life Battery

Never miss a sale with the Pro's high capacity long life battery

Dual Comms (Pro and Pro Lite)

Connect your terminal through Wi-Fi and/or Simcard (with up to 4G connectivity).
